

SynQro Supervision software for training and competitions

SynQro supervision system features

- Organization of official competitions, thanks to rich, intuitive software
- Real-time management of shooting activities on the range
- Live on-screen visualization of shots and matches
- Dynamic, interactive training

Training

- Shooting range supervision from your laptop
- Parallel allocation of activities for one target, one target group, several target groups
- Export of results for all activities in PDF and/or CSV format

Official competitions

- Import of Start lists
- Control of all targets from your laptop
- Centralized control of ISSF-standard or customized parameters (number of rounds, number of shots, trial times, match times, target settings, etc.).
- Management of all phases of the competition: management of exceptions and unforeseen events (target changes, penalties, refereeing decisions, etc.).
- Share results on a large screen (TV screen and/or overhead projector)
- Export competition results: match sheets, results in CSV format for integration in databases

SynQro supervisor configuration

- Independent Wi-Fi with router or wired installation (as required)
